Genesis of the Conference

The field of Genomics & Pharmacogenomics is growing rapidly and its development is making tremendous impacts in medical sciences and pharmaceuticals.

Pharmacogenomics uses information about a person's genetic makeup, or genome, to choose the drugs and drug doses that are likely to work best for that particular person. Genomic research has changed that "one size fits all" approach and opened the door to more personalized approaches to using and developing drugs. This new field combines the science of how drugs work, called pharmacology, with the science of the human genome, called genomics. It has made huge advancements over the course of time and is continuing to influence various sectors.

Pharmacogenomics is the tailoring of drug treatments to people's genetic makeup, a form of 'personalised medicine'. This conference aimed to upgrade professionals engaged in pre-clinical & clinical aspects of drugs with changed perspectives and to provide an opportunity to upgrade their knowledge of drug and thereby help them go a long way in drug research using genomic & pharmacogenomic approaches.

Aim of the Conference

This conference was organized and conducted in order to understand

- how genomic information can be used to develop more personalized and cost-effective strategies for using drugs to improve human health.
- to lead to better ways of using drugs to manage heart disease, cancer, asthma, depression, epilepsy, and many other common diseases.
- to produce new drugs that are highly effective and do not cause serious side effects.
- to create a huge platform for scientists, professors, students and delegates to share their ideas and innovations and in turn enhance the progression of science and technology in both business and academia around the world.
- to bring together a unique and international mix of genome researchers, geneticists, molecular biologists, health-care industrialists, leading universities and research

institutions making the conference a perfect platform to share experience, foster collaboration across industry and academia, and evaluate emerging technologies across the globe.

Target Audience

Targeted to students (B. Pharm, M.B.B.S., B.Sc., M Pharm, M.Sc., M.S. Scholars), Academicians, Scientists, & Doctors who wish to get updated with this area .

REPORT

On 03rd Aug 19, Conference was begun with the Inauguration of Registration Counter at 9.00 am. Delegates reached to venue from different parts of country. College has provided the taxi facility to Pickup & Drop for delegates coming from out station. They completed their Registration at Registration Counters. They were welcomed by giving a rose flower & handed over their Kit by Registration Committee. After that registered delegates enjoyed their yummy breakfast & tea from 9.00 am.

Conference was inaugurated on 03rd Aug 19 at 10.30 am. During inauguration, Hon'ble **Shri Nilayji Naik**, Member of Legislative Council, Maharashtra State; **Shri Jagdish G. Wadhwani**, President, Yavatmal Zilla Vikas Samiti; Guest of Honor **Dr. K. Satyamoorthy**, Professor & Director, School of Life Sciences, Manipal Academy of Higher Education, Manipal; **Dr. Ritushree Kukreti**, Senior Principal Scientist, Institute of Genomics & Integrative Biology, CSIR, New Delhi; **Dr. Anil Chandewar**, Principal, P.Wadhwani College of Pharmacy, & Convener of conference were present on the dais. Delegates came from different states of India witnessed the inauguration function. Hon'ble **Shri Nilayji Naik**, Member of Legislative Council, Maharashtra State inaugurated the conference by cutting the ribbon. Inauguration was followed by Sarswati Poojan & floral warm welcome of guests by Members of Organizing Committee. Conference Souvenir was published at the hands of respected Hon'ble members present on the dais. **Dr. Nitin Kochar**, Co-convener of conference welcomed the guests & delegates came for conference. He highlighted on the theme of conference. During his speech he spoke about the genesis of conference, worldwide present status of research on genomics & pharmacogenomics, & about the number of delegates came for poster presentation & attending the conference. About 142 candidates registered as Delegate, out of which 45 delegates participated in Poster Presentation Competition. **Dr. Anil Chandewar** during his Introductory speech, explained the importance of Pharmacogenomics in individual life. He further added individual patient responds differently for the same drug. Hence, treatment should be more focused individually considering his genome &

physiology so that toxicity & adverse effects of drug treatment can be minimized. Hon'ble **Shri Nilayji Naik** in his speech shared his experiences related to drug treatment. He told that every individual has a specific genome structure which are hereditary. Doctor prescribes drug on the basis of symptoms & age of the patient. But, it should be based upon the individual genetic makeup & sensitivity. He further demanded the need of individual patient treatment based on his genome study.

Inaugural program was conducted by Dr. Shilpa Gawande & Vote of Thanks was extended by Dr. Abhijit Shrirao.

It was immediately followed by the First Session of **Dr. Ritushree Kukreti** at 11.30 am. Chairperson for this session was **Dr. Pranita Kashyap**, Principal, Dr. R.G.
